

# FH Fintech For Health

## What is Fintech for Health?

**Fintech for Health** is a platform that aims to help low to moderate income patients pay for and access high quality care using digital financial services and a financial inclusion approach.

Through Fintech for Health, we will:

Identify best practices and key opportunities for digital finance in healthcare

Introduce the fintech and healthcare industries and identify opportunities for collaboration.

Design new partnership models around Fintech for Health.

## Why Fintech for Health?

Out of pocket spending on healthcare costs are one of the greatest threats to the financial security of people around the world. According to the World Bank:

100 million people are forced into extreme poverty every year due to healthcare expenses

In developing countries, patients and their families typically bear the burden of high healthcare costs.

## WE WILL

Conduct **research on best practices** of models blending finance services and healthcare innovations

Identify key **problem statements** of all six markets

Promote **cross-sectoral innovation** in healthcare access and affordability

Organize **seminars, workshops, and networking events** to facilitate collaboration and knowledge sharing

**Test and scale projects** that help people pay for and afford the care they need, when they need it.

## IMPACT

Over three years, we will facilitate the co-creation and launch of **9 projects**, reaching **500,000** moderate and low income people, in **Bangladesh, China (Mainland), India, Malaysia, Nepal, Vietnam**

## WORK WITH US

### Healthcare Services Organizations

Problem statements and pilot project sites for new Fintech for Health models.

### Digital Health Startups

Integrate digital financial services and innovative financing approaches to their existing platforms.

### Financial Services Companies

Provide the capital and formal lending services that patients need.

### Fintech Platforms

Integrate digital financial services and innovative financing approaches to their existing platforms.
